To Whom It May Concern:

We at Marion County Facilities Management have used Rispoli & Associates Architecture, Inc. formerly known as Architecture Studio, Inc. for over 26 years as an architect for design on our construction projects.

In the past, they have worked on our largest project to date, the Judicial Center Expansion, a \$42 million project. Another large project that they designed was the Jail Expansion, a \$29.5 million project. Other projects with which they have been involved include: the Emergency operation Center, the Interim Barracks at the Jail and Video Visitation building, the Animal Center addition and roof over, the Growth Management building, and all new Library construction – including the Ocala Headquarters, Dunnellon Library, Freedom Library, Belleview Library, and the Forest Library in which we received a Gold LEEDs rating, under their leadership.

All principals and staff of this company are a pleasure to work with. We have found them to be very approachable and available to meet any needs or concerns and work quickly to meet every deadline. They have been available from beginning to end of each project to ensure that construction is done according to the plans.

Sincerely,

Andy Race
Facilities Management Director

"Meeting Needs by Exceeding Expectations"
