To Whom It May Concern:

I have worked with Architecture Studio Inc. for 4 years and the experience has been rewarding. We just finished the Emergency Operations Center last year and are currently in construction for the Communications Center and both projects have been well designed ahead of schedule while meeting our tough budget demands. They listened to our needs, provided multiple solutions that made sense and were functional with regards to operations as well as staffing.

They are a local firm that is readily available and are easy to communicate with either via office phone, cell or email. Their single source of responsibility/communication is certainly helpful, while the design process has been extremely easy, as they do not complicate matters and take a common sense approach. Architecture Studio understands government and maneuvers well through the process to gather what is needed for the betterment of the project. Their willingness to satisfy the county's needs is quite refreshing.

I enthusiastically recommend Architecture Studio Inc. for your Emergency Operations Center/Communications Center project.

Sincerely,
